Turbo charged collaboration

Whether you’re new to using Viewpoint software or a long-time customer, there is always something new to learn. Viewpoint Professional Services can help design and deliver simple, easy-to-maintain custom solutions for your most complex business problems. Let us work with you to expand and sharpen your Viewpoint knowledge through classes and services to meet your and your clients’ business needs.

Would you like to customize your own checks? Have you tried our latest training classes?

• **CREATING BASIC CHECKS** - You’ll learn how to create a basic check to submit to your bank, as well as how to add company account information, MICR line, bank information, and check amount, and then submit it to your bank for approval.

• **ADDING TO YOUR BASIC CHECK** - Learn how to modify your basic check to include logos, signature, and company information. We’ll also show a few Crystal Reports formatting tips and tricks to make formatting your checks a breeze.

• **BASIC SQL** - Although many changes can be made to a report through Crystal Reports, the real power of your reports are unleashed through more sophisticated means, such as SQL stored procedures. In this class you’ll learn not only the basics of SQL queries (types of joins, simple optimization techniques, driving tables, etc.) but also how to create basic store procedures. Stored procedures lay the foundation for re-usable code, easier maintenance, and more complex reports. Make your life less stressful and increase your report’s value by enrolling in this class today!

**NOT ENOUGH TIME? MORE PRESSING PRIORITIES? HAVE US DO IT FOR YOU**

Navigating the Viewpoint data models without prior experience is like working a job without the proper equipment. It will take longer and cost more than a trained and properly equipped crew. With access to developers and product managers and years of experience with Viewpoint modules, our Professional Services team is ready to take on your most complex problems and create simple, easy-to-maintain solutions. Buy blocks of hours and get a discount over current hourly rates:

- **Buy 10 hrs at 10% off – a $200 SAVINGS**
- **Buy 20 hrs at 15% off – a $600 SAVINGS**
- **Buy 50 hrs at 20% off – a $2000 SAVINGS**

Do you prefer to do the work in-house but need a bit of help every once in a while? Try our consulting package. Buy in blocks of 10 hrs and get 10% off. Use time on an ‘as needed’ basis for Crystal Report, SSRS, Viewpoint database, or SQL questions.
