Viewpoint Can Help

Rock-Solid Investments Fuel Growth for Viewpoint Construction Software

or more than 35 years, Viewpoint has been a provider of innovative construction-specific software solutions to meet the needs of the global construction and capital project industries. Viewpoint provides the tools needed to improve project profitability and visibility, manage risk and effectively collaborate with the entire project team. Viewpoint solutions include everything needed from preconstruction to construction and facilities maintenance. offered on a variety of platforms, including cloud, mobile, SaaS and on premises.

Viewpoint recently expanded its headquarters in Portland's Central Eastside Industrial District leasing the historic 1510 Water Avenue building to make room for a growing employee base. The 1510 building has been redeveloped into a state-of-the-art space for software development, holding 150-200 technology professionals.

VIEWPOINT

CONSTRUCTION SOFTWARE®

Viewpoint offers a truly comprehensive construction-specific ERP software suite for enterprise customers, Vista by Viewpoint, and an all-one-solution with accounting, project management and estimation for small to medium business contractors, ProContractor by Viewpoint. Additionally, Viewpoint offers point solutions, which are products capable of integrating with other construction-specific

accounting and project management solutions on the market, including Viewpoint For Content Management, Viewpoint For Mobile and the latest offering of project and BIM collaboration software, Viewpoint For Project Collaboration.

Viewpoint's configurable user database allows customers to tailor the software to meet their specific business needs. A robust import module that connects with most third-party software, such as estimating and payment solutions, extends the integration across all corners of a commercial construction firm. The user database gives users the ability to add versatile tables that can be associated with different records - not just fields - which is unique amongst competitors in the construction industry. Viewpoint offers the convenience of off-theshelf software with the flexibility and customization of custom software, enabling customers to take advantage of all enhancements.
